

## West County Radiological Group, Inc.

11475 Olde Cabin Rd., Suite 200 • St. Louis, MO 63141 • 314-991-8200 • [www.westcountyradiology.com](http://www.westcountyradiology.com)

West County Radiological Group, one of the largest radiology groups in the state, offers specialized radiological services in the areas of diagnostic radiology, radiation oncology, nuclear medicine, and medical physics. The group operates primarily through the St. John's Mercy Medical System and is currently expanding its teleradiology services in Missouri and Illinois.

All physicians are board-certified and represent subspecialties in radiation oncology, nuclear medicine, breast imaging, neuroradiology, musculoskeletal imaging, pediatric imaging, interventional radiology, body imaging, and cardiology. Physicians are trained in kyphoplasty to treat spinal fractures, as well as coronary CTA, a noninvasive study to evaluate the heart vessels. The radiation oncologists currently offer 3-D conformal radiation therapy, image-guided radiation therapy (IGRT), intensity-modulated radiation therapy (IMRT), high-dose-rate (HDR) brachytherapy, and radioactive prostate seed implants. In July 2008, it began offering stereotactic radiosurgery

and stereotactic body radiation therapy through St. John Mercy Medical Center's Cancer Center.

Dr. Jeffrey Thomasson, the president of the group, is also the current president of the Missouri State Medical Association (MSMA). Other physicians in the group serve as officers and councilors and sit on the Board of Directors for organizations including the St. Louis Metropolitan Medical Society, the Missouri Radiological Society and the American College of Radiology.
